

WATER RESTRICTION NOTICE

Dear Guest,

Please take note that **critical water restrictions** have been implemented in the Western Cape and we urge you to please assist us to stay within our water usage limits of **less than 50 litres of water per person per day**.

Club Mykonos has put the following **plan of action** and **water saving guidelines** in place for our guests to reduce the overall water consumption on the resort:

- **Towels & Linen:** Please take note that your towels and linen will not be replaced during your stay. Should you need clean towels or linen as a matter of urgency, please contact reception.
- **Shower buckets:** Please use the plastic bucket provided to collect your shower water and use this to flush the toilet. Please leave bath plug in when showering in a bath / shower unit to collect the water.
- **Flushing of toilets:** Please think twice before flushing your toilet! Only flush when necessary and use the collected shower water to flush when possible.
- **Report leaking toilets and taps** immediately to maintenance or reception.
- **Reduce showers** to short 3-minute showers.
- Please **use water sparingly for food preparation** and cooking.
- Please **leave your empty water bottles** in the Kaliva or at collection bins at reception.

Further to the above, Club Mykonos has implemented the following to further reduce our water consumption on the resort where possible:

- Changed filtration systems on all swimming pools.
- Grey Water Irrigation Project in operation for watering of gardens and lawn areas.
- Installed tanks to collect rain water.
- Installation of water-efficient plumbing fittings and water-saving devices wherever possible.
- Car Wash is using rain water.
- All employees are committed to the FEDHASA water saving pledge.

Please help us in saving this precious resource. Thank you!

WATER IS SCARCE – USE IT WITH CARE!!!
